

JOB DESCRIPTION – SITE INCHARGE

Job Opening: Site Incharge

 **Experience:** +3 year

 **Department:** Operations and Maintenance

 **Location:** PAN India

Job Brief:

We are seeking a dedicated and skilled Site Engineer to ensure the seamless operation and maintenance of our Toll Management System (TMS) infrastructure. This role is crucial for maintaining high equipment uptime, minimizing downtime, and supporting efficient toll plaza functionality.

Key Responsibilities:

- ✓ Monitor and maintain all toll plaza equipment (**e.g., boom barriers, RFID readers, WIM, AVC, CCTV, lane controllers**) to ensure 99% device uptime.
- ✓ Promptly diagnose and resolve technical faults and breakdowns.
- ✓ Execute preventive maintenance schedules for critical toll equipment.
- ✓ Prepare and circulate daily operational and maintenance reports.
- ✓ Maintain and **troubleshoot hardware issues in desktops, servers, and specialized toll plaza equipment.**

Skills & Requirements:

- ✓ Strong working knowledge of Windows-based operating systems (**client and server**).
- ✓ Knowledge of networking concepts (**IP addressing, DHCP, DNS, VLANs**) and configuration of network devices (**switches, routers, access points**).
- ✓ Proficiency in hardware troubleshooting and maintenance of IT equipment and specialized toll plaza devices (**UPS, AVC, WIM, RFID readers**).
- ✓ Ability to use network diagnostic tools.
- ✓ Excellent problem-solving skills and attention to detail.

 **Education:** Diploma, B.E., or B.Tech in :

- Electrical Engineering
- Electronics Engineering
- Computer Science
- Information Technology
- Mechanical Engineering
